File(s): Hawaii Tobacco & Alcohol ; Side by side HI bills

Enclosed is an analysis of H3971, the Liquor Commissions bill, and a side-by-side comparison of S3049, the industry supported bill, and H3971. Also enclosed is a comparison of the general regulation of alcohol and tobacco in Hawaii. There are some technical differences in various provisions between S3049 and H3971, such as licensing, sale to minors, purchase by minors, training, license suspension and training. You may want to refer directly to the liquor commissions bill. The technical differences appear to be correctable by replacing those sections with language from S3049.

Please make note of the fact that the liquor commission bill requires retailers to purchase all tobacco from wholesalers. Plus, it appears as though some of the restrictions on number of liquor licenses and business hours for liquor licenses may apply to tobacco licenses in H3971.

Derek, please provide copies of the bill to the WRO people. I will hand deliver a copy of the bill with the comparison to the NYO people.

Per Jim's note below, he needs a response by Monday or Tuesday. I will be in the NYO office both days, so please respond to me as soon as possible.

Thanks.
